406.963.7239 (Rick's Cell Phone)

Open House Sale Preview

At the Ranch on April 6, 2020. Lunch will be served at noon, the Auction starts at 1:00 pm. The bulls can be inspected at any time prior to the sale by contacting Rick or Lanette.

Retained Interest

Hansen Registered Angus is retaining 1/3 revenue sharing interest in all the bulls selling. Full salvage value belongs to the buyer. Should we, the seller, wish to collect semen on any of the bulls it would be at the seller's expense and the buyer's convenience.

Health

At Branding (2-3 months of age): Vision 7, Bovashield, Injectable Dectomax

Pre-Weaning: Vision 7 Somunus, EXPRESS 5 PHM, Multimin

Weaning: Vision 7 Somunus, Inforce 3 Nasalgen. Poured with Dectomax Pour-On

Bulls will be poured with Ivomec and vaccinated with Virashield 6 prior to delivery.

Volume Discount

We will give a 3% discount on 3 bulls, 4% discount on 4 bulls or 5% discount on purchases of 5 or more bulls by the same buyer.

Scrotals & Current Weights

One week prior to the sale Actual Scrotal Measurements and Current Weights on the sale bulls can be found on our website, www.hansenregisteredangus.com on the "Sale Info" page and will also be available sale day at the ranch.

Terms

Payment will be due to Hansen Registered Angus on the date of sale unless other payment arrangements are made.

Delivery

Bulls will be delivered beginning June 1st, unless the buyer requests that a bull be delivered earlier. Free delivery up to 500 miles. Over 500 miles at cost. Registration papers and Semen Evaluation Test results will accompany the bulls at delivery.

Ballyhoo GO!

Find our interactive catalog in the free Ballyhoo Go! app. Take notes, compare and filter bulls, view current EPDs, videos, color lot pictures, and more all in one place. View Details on page 6.

Guarantee

ONLY bulls purchased on April 6th, 2020, at our opening day auction are guaranteed against any injury that would keep them from being a breeder for the first breeding season. If a problem occurs, please contact us immediately. A suitable replacement (if available) will be provided OR a credit minus a salvage value of not less than \$2000 will be given toward next year's sale. The buyer will choose the preferred option. The guarantee does not cover the death of the bull or any treatable condition, such as foot rot, pinkeye, etc. **All claims must be made by September 1, 2020. This guarantee will end as of September 1, 2020.** We reserve the right to have a veterinarian of our choosing inspect the bull in case of injury.

Cattlemen,

Welcome to our 2020 Spring Bull Sale. You'll notice that our sale date of April 6th is later than sale days in years past. We took advantage of an open fall with abundant grass that allowed us to leave the calves on their mothers a month longer than expected. We held off on weaning until December 1st, meaning the bulls went on feed a month later than usual, all of which leads to a later sale date.

The yearling bulls we are offering for sale represent what we consider to be the top half of the bull calves born in 2019. They are evaluated first and foremost for their structural soundness, as well as that of their mothers. Those of you who have followed our program know that the structural makeup, udder quality, sound feet and leg structure and quiet disposition are what we strive to enhance in our cowherd. E.P.D.'s are a long way down the list of priorities as we feel there are many other traits that come before them in our breeding program. We will never believe that an E.P.D. can tell you more about an animal than the time-tested, proven genetics behind that animal can.

The bulls have been fed a ration of 1 pound of CHS Bull Challenger pellets per 100 lbs of body weight, along with 2 pounds of DDG not to exceed 10 pounds combined per head per day. Long stem grass hay is available to them free choice. Why one would feed breeding animal a fattening ration is beyond me. The saying "Fat Sells" makes me wonder who pays the price for such an ill-advised philosophy. I would be willing to bet it's not the seller.

Actual Weights and Scrotal Measurements will be posted on our website, www.hansenregisteredangus.com, one week prior to the sale.

Our opening day auction will begin at 1:00 on April 6th starting with Lot 1 and continuing in catalog order. Bid increments of \$250.00 will be used. Any bull not purchased during the auction will be offered on a first-come, first-served basis beginning April 13th. Bulls will not be sold for less than the opening bid price in this catalog.

We invite you to join us on April 6th to inspect the bulls, and then have lunch beginning at noon. Should you have any questions about the sale offering or our breeding program or would like to see the bulls prior to sale day, please call us anytime. Our phone numbers are listed throughout the catalog. We very much appreciate your past support and look forward to seeing you on sale day. If you can't be here for the sale, you may leave your bid with us and we will implement it as you direct us to.

Sincerely,

Rick & Lanette

PS: To those of you who may have an interest, we will be offering a group of home-raised bred heifers for sale this fall. We'd be happy to show you the heifers on sale day.

www.hansenregisteredangus.com

Hansen Registered Angus is located in the northeastern corner of Montana, about 7 miles west of the Montana/ North Dakota state line and approximately 50 miles south of the U.S./ Canadian border.

My wife, Lanette, and I own and operate the ranch where I was born and raised. We have three children: Paul and his wife, Megan and their daughter, Molly and son, Oscar; Eric and his wife Cecilia and their children, Caleb, Eli, Gabby, Avery, Lucia, Tessa, and Bernadette; and Beth and her husband, Brendan and their son, Lucas and daughter, Grae.

We purchased our first registered Angus cattle in 1982 and have been raising Angus ever since. Long, harsh winters and short growing seasons with limited rainfall have shaped our breeding philosophy. Winter feed is our main expense and while the majority of it is raised on the ranch, supply often dictates that we purchase hay and/or supplements. Grazing consists of primarily native grass while most of our tillable ground is used as hay land or seeded to tame grass varieties for early and late season grazing.

In addition to our Registered herd, we, along with Paul and Megan, also run commercial cattle. We A.I. both herds and have enhanced our genetics through the use of our embryo transplant program.

We focus our emphasis on the Angus cow, hence our motto: "Sound Proven Maternal Genetics." We always look forward to visiting with fellow Angus producers, and encourage you to call us at 406.963.2239, email us 2rhansen@nemont.net, and visit our website at www.hansenregisteredangus.com.

— Breeding Philosophy —

To Lanette and me, the survival of the Angus Breed is based on what made it as prominent as it is today: Angus Cow. So when we say, “Sound, Proven, Maternal Genetics” this is what we are referring to.

SOUND: By this, we mean structurally correct. I think it speaks volumes that no one has come up with an E.P.D. for structural soundness. I believe it is the first and most essential consideration in a breeding program. Interestingly, structural correctness can only be evaluated by a good eye for it--not by some quantifiable number. We evaluate soundness by some basic optics: Level top lines with a tail head pointing at the horizon, not the moon. Feet and legs that point the same way as the cow faces with ample room between them, giving her the capacity to convert forage to sustain her in harsh environments. An udder with a level floor, strong center support and high tight attachment and teats about the size of your thumb that are evenly placed on the udder floor. She is wedge shaped, wider through her hips than her shoulders while still maintaining what we refer to as “base width,” or a wide chest floor and smooth shoulders. Feminine necked and a wide muzzle for grazing also are important characteristics when we evaluate our females. We do not hesitate to cull those cows that do not adhere to these criteria. It is evident to us that the cows that possess these characteristics are more fertile and thereby lend themselves to another trait that is as important to profitability as any, that being longevity. Research has shown that a cow, on average, is not profitable until she is 4 to 5 years of age. Culling her at a young age because she didn't breed or has broken down structurally from bad feet, a bad udder or is stifled from bad leg structure is costly no matter what her E.P.D's are.

PROVEN: Given that we measure a bull by the daughters he leaves us, we are prone to use genetics that have withstood the test of time. The vast amount of our pedigrees include the following bloodlines, most often close up in their pedigree:

- “Rito” through FO203 and Rito 149
- “Wye” through Viking GD60, Shoshone Vantage, Forever of Wye, Commodore of Wye and Fabron of Wye.
- “Emulous” through Emulation 31 bloodlines and P.S. Power Play and “Bandolier” through Band 105 and Traveler 23-4.

We do not use Sires or Dams with genetic defect carriers in their pedigrees regardless if they have been DNA tested free or not.

MATERNAL: While quite often maternal is used in general terms, to us it means calving unassisted, promptly getting up to dry her calf off and getting the calf up to nurse. Perhaps maternal can best be described as mothering ability. Her disposition should be such that she is attentive to her calf without being hostile or a threat to us. While maternal is often associated to mean milk production, we believe, as stated before, that without sound functional udder structure the level of

milk she produces is irrelevant. Finding the balance between adequate milk production to raise a good, healthy calf and udder structure that enhances her longevity is what we strive for.

As you have probably ascertained by now, we are not a breed by the numbers producer of seedstock. Our environment and resources dictate the type of cattle that are the most profitable. I couldn't look at a bull or cow and tell you what frame size they are and I'm damn sure not going to start carrying a tape measure around to find out. All I know is I don't like them small and I don't like them tall and hard doing. Logically, it would seem that length, depth and thickness dictate weight and that is the visual measurement I go by. If pressed, I would describe our cattle as being the “big side of the middle of the road” when it comes to frame.

	YA Black Belle 128	

"518" is a home-raised bull that is linebred to EXT. He is one of four flush brothers that we used on both our registered and commercial cows. "518" posted an average nursing ratio of 106 on 40 calves. They have moderate birth weights, are long bodied and extremely correct. "518's" dam is a Great Plains daughter that we flushed extensively. Her progeny consistently rise to the top for production and possess the phenotype we strive to produce.

HRA Cedar 558

	H 96 Bluebird Lass 4912	

"558" has become the heir apparent to his sire who was used here for 10 years as a calving-ease sire. "558" is a calving ease bull as well and sires the same thickness and body type as his sire. The dam of "558" is also a daughter of CH Quatum 3330 making "558" a half-brother, half-sister mating. We flushed the dam of "558" and have used her genetics in both our registered and commercial herds. The first daughters of "558" that we have calved are exactly the type of females we strive to produce. If you are looking for bulls to use on heifers don't overlook the sons of "558".

Linebred is a sure-fire calving ease sire that we have used for the past several years. He consistently sires light birth weights and his calves at birth are up and sucking in a flash. We have calved quite a few of his daughters and they are the kind that are going to stay in the herd to 10 years of age and beyond. Here again, if you are looking for bulls to use on heifers, don't miss out on these "Linebred" sons.

"Phylix" is another intensely linebred Shoshone Viking bred bull we used AI because of his strong maternal heritage. Much like the "6141" bull, "Phylix" sired calves are very uniform in their type. The dam of "Phylix" is about as perfect in the structural makeup as you will find. If you want to make a set of replacement heifers that have the proven genetic background to do just that, take a look at these "Phylix" sons.

Shoshone Ester 3141	Dixie Erica of C H 615	
Shoshone Ester 3128#	Shoshone Encore 6310	
	Shoshone Ester 3116	

We used "6141" as an AI sire to introduce the Shoshone Influence more prominently into our herd. "6141" is widely known as a very strong maternal sire whose progeny are very fertile with high-end libido. His bull calves here have performed well at weaning and on feed. His heifer calves are feminine, wedge shaped and have the distinct phenotype of the Shoshone Viking bloodlines. We will be keeping one of his sons to use back on our registered cows.

Lassie Advantage 6419 J D Y	Shoshone Vantage JB23	
	Rito Lassie C W Y 641	

We only have a couple "510" sons in the sale as he sired far more heifers than bulls, which suits us just fine. We consider the dam of "510" to be the best cow we ever owned. Her influence here is hard to describe and will be prominent for a long time to come. Both her sons and daughters as well as her granddaughters will influence our genetics for years. We have calved a set of "510" daughters and are very pleased with the large group of his daughters in the replacement pen. Unfortunately, we lost "510" to injury but we do have semen in the AI tank. "510" is co-owned with Keith and Nikki Medalen at Towner, ND.

REFERENCE SVR RR RITO 707 EDEN 5107

 F W R Miss 105 Rito 131# Band 234 of Ideal 3163#
 F W R Miss 149 Rito 725

5107 was purchased from Spring Valley Ranch in South Dakota. Given the affinity I have for proven maternal foundation genetics, I couldn't pass up on the chance to own this bull. A son of RR RITO 707, who has had as much if not more influence on the Angus breed than any bull in its history, 5107's foundation bloodlines don't stop there. His dam is an own daughter of Shoshone Viking GD 60. Her dam is a daughter of Band 105 (who is also the sire of QAS TRAVELER 23-4) who is in turn a daughter of RITO 149, who is sired by none other than RR RITO 707. 5107 is a thick, moderate framed bull with perfect feet and excellent structural correctness. While his first calf crop was above our average for birth weight, they were well within what we consider an acceptable range and we did not assist any of his calves at birth. His bull calves mirror 5107 phenotypically and we absolutely love his heifer calves who display exactly the "type" you would expect given the blue-ribbon pedigree of their ancestry. 5107 is co-owned with Littau Angus Ranch of Carter, South Dakota.

 YA Black Belle 505 O C C Great Plains 943G#
 YA Black Belle 360

"795" was used as a cleanup bull after AI and will see more use here. He is a son of the "330" bull that we sold to Bob and Sally Yadon at Manhattan, MT and his mother is a daughter of the "505" cow who is also the dam of the "518" bull who has sons in the sale. The dam of "795's" sire is a daughter of our foundation "34" cow so you can see the priority we place on wrapping up the cow families that prove themselves over time. "795" sired light to moderate birthweights with an abundance of length and muscle. He is a very eye appealing bull who fits the genetic profile that we strive to produce.

 Cole Creek 104 Juanada 1256

"791" was purchased from J Bob Hould at Havre, MT in his 2018 bull sale. We only have 1 bull calf by him in this sale but he is a dandy. We are keeping a few of his other sons to use on our commercial heifers this breeding season. "791" was used as a cleanup bull on our yearling heifers after AI and did a wonderful job. He is a calving ease bull who is very consistent in the birthweight and type he sires. If you will look at his pedigree you will notice that both the dam of his sire and mother is the same cow. She is the foundation of JBob's herd as he has numerous daughters of her and has used many of her sons as well. Additionally, "791's" grandsire is also the grandsire to the sire of his dam. (Notice a pattern in our genetic selection process here?) We will have a lot more calves by "791" born this year as we turned him out with about 30 cows this past breeding season. Co-owned with J Bob Hould at Havre, MT.

Directions to the Ranch:

From Froid, MT: Head East through Froid on Hwy 405 for 13 1/2 miles (pavement will end after 9 miles). Turn North just past the Hansen Registered Angus sign. Head North for 2 miles; our house is on the west side of the road.

What's better than this sale catalog rolled up in your back pocket?

The catalog on your phone that's always in your pocket!

... and having it interactive!

- View color lot pictures, pedigree, EPDs, updated EPDs performance data, videos and more all in one place.
- Search for cattle by birth dates, sire, MGS, EPDs, updated EPDs and weights.
- Rate the animals, even compare side by side to find what will best serve your program.

- Notifications as more information is available and reminder of sale day.
- Connect with the breeder quickly and easily.

Suitable for Use on Heifers

Suitable for Use on Heifers

We kept virtually all of the registered and commercial 2019 heifer calves with the intention of breeding them and selling bred heifers. Keep us in mind if you're looking to buy bred females this fall.

Call Rick at 406-963-7239
or Paul at 406-480-9798.

We'd be happy to show you what we've got anytime.
